- To explain, justify and record groupings.
- To learn how to investigate and conduct a fair test.
- Learning about different types of soils and the variety of plants that grow in them.

AT HOME you could:

- Encourage your children to research and learn about plants and flowers from around the world.
- Sort and classify plants that you see.

International Primary Curriculum (IPC)

The International Primary Curriculum (IPC) is a 21st century curriculum which extends children's knowledge, skills and understanding in subjects by developing personal attributes and supporting an international perspective in a way that responds to the changing world around us. IPC is an internationally-minded curriculum which is used in over 60 countries.

By using IPC we are able to nurture a love of learning and encourage the necessary key skills and personal qualities; such as team work, research and creativity, flexibility and thoughtfulness which will help children to become able and inspired learners. In addition to this, children will extend their knowledge and understanding of communities beyond that of our own country by exploring many aspects of other societies and ways of living.

This term's topics are: 'Active Planet,' 'Scavengers and Settlers' and 'Different Places, Similar Lives'.
