

Add and subtract 0.1 and 1 to/from numbers with 1 decimal place.

0.1	0.2	0.3	0.4	0.5	0.6	0.7	0.8	0.9	1

The numbers in this grid go up in steps of **0.1** instead of steps of 1. What number will be at the end of the row?

That's **one** at the end ... NOT zero point ten!

Let's count along to find out...

Add and subtract 0.1 and 1 to/from numbers with 1 decimal place.

0.1	0.2	0.3	0.4	0.5	0.6	0.7	0.8	0.9	1
1.1	1.2	1.3	1.4	1.5	1.6	1.7	1.8	1.9	2
									3
									4
									5
									6
									7
									8
									9
									10

On a 1–100 grid, when we move down the grid, we add 10.

Going down, what do we add on *this* grid?

What will be in the very last square of the grid?

Let's count along to check.

Let's count down the right-hand (ones) column to check..

Add and subtract 0.1 and 1 to/from numbers with 1 decimal place.

Let's check...

0.1	0.2	0.3	0.4	0.5	0.6	0.7	0.8	0.9	1
1.1	1.2	1.3	1.4	1.5	1.6	1.7	1.8	1.9	2
			2.4	2.5	2.6				3
				3.5			3.8		4
	4.2								5
									6
									7
								7.9	8
									9
									10

$$2.5 + 0.1 = 2.6$$

$$2.5 - 0.1 = 2.4$$

$$2.5 + 1 = 3.5$$

What numbers would go in the highlighted squares? How can you find them?

in each calculation
