## Week 6, Day 2

Kilometres and miles

Each day covers one maths topic. It should take you about 1 hour or just a little more.

1. Start by reading through the Learning Reminders. They come from our PowerPoint slides.

2. Tackle the questions on the Practice Sheet. There might be a choice of either Mild (easier) or Hot (harder)!
Check the answers.

3. Finding it tricky? That's OK... have a go with a grown-up at A Bit Stuck?

4. Have I mastered the topic? A few questions to Check your understanding. Fold the page to hide the answers!

Identify the value of the ' 4 ' in the following numbers:
(a) 3.407
(b) 4.821
(c) 0.043
(d) 5.104
(e) 48,739

How many times must Dan multiply 0.048 by 10 to get 48,000 ?
$\qquad$

What number is one hundred times smaller than 0.4 ?

## Learning Reminders

## Learning Reminders

## Know approximate conversion between miles and km; Draw a line graph and read intermediate points.

> Distances on signs in the UK are shown in miles. Do you know of any countries where distances are shown in kilometres - countries where you have holidayed or where relatives live?

## A mile is longer than a kilometre, and a good approximate rule to convert from miles to kilometres or vice versa is to remember that 5 miles is approximately $8 \mathbf{k m}$.

| Miles | Kilometres |
| :---: | :---: |
| 0 | $\mathbf{0}$ |
| 5 | $\mathbf{8}$ |
| 10 | $\mathbf{1 6}$ |
| 15 |  |
| 20 |  |

So how many kilometres is the same as 10 miles? 15 miles? 20 miles?

We could use the ratio to write more facts in this table.
We can find more distances very quickly if we draw a line graph...

## Practice Sheet Mild <br> Converting between miles and kilometres

Use the graph to convert the following distances to the nearest kilometre.

1. 5 miles
2. $\quad 7.5$ miles
3. 6 miles
4. $\quad 15$ miles

Use the graph to convert the following distances to the nearest mile.
5. 4 km
6. 16 km
7. 19 km
8. 21 km

## Challenge

Use your answers to estimate how many kilometres are equivalent to:

1. 30 miles
2. 20 miles
3. 25 miles
4. $\quad 100$ miles
5. 1 mile (to 1 decimal place)

## Practice Sheet Hot <br> Converting between miles and kilometres

These are five of the UK's long distance footpaths:

- The Ridgeway - 86 miles
- Pennine Way - 431 kilometres
- Glyndwrs Way - 135 miles
- Cape Wrath Trail - 378 kilometres
- The Ulster Way - 665 miles

Draw a graph to help you convert these distances from
 miles to kilometres and vice versa.

How will you label the $x$ - and $y$-axes to allow for these large numbers?

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

## Practice Sheets Answers

Converting between miles and kilometres (mild)

| 1. | 8 km | 5. | 2 miles |
| :--- | :--- | :--- | :--- |
| 2 | 12 km | 6. | 10 miles |
| 3. | 10 km | 7. | 12 miles |
| 4. | 24 km | 8. | 13 miles |

## Challenge

| 1. | 48 km | 4. | 1600 km |
| :--- | :--- | :--- | :--- |
| 2. | 32 km | 5. | 1.6 km |
| 3. | 40 km |  |  |

## A Bit Stuck? Distances from home

Use an online mapping tool (e.g. Google maps) to find at least 6 places less than 15 miles away from your home.

Use the graph to estimate those distance in kilometres, then change the units of measurement in the online mapping tool to check.

Build up a table like this:

| Place | Distance (miles) | Estimate (killometres) | Actual (kilometres) |
| :--- | :--- | :--- | :--- |
| Dunsford | 15 miles | about 25 kilometres | 24.1 kilometres |
| Moreton | 8 miles |  |  |
|  |  |  |  |

Can you use some results to work out others?

# Check your understanding Questions 

Use this fact: 5 miles $=8 \mathrm{Km}$

- 50 miles is $\square$ km
- $\square$ miles is 4 km
- 32 km is $\square$ miles
- 15 miles is $\square$ km
- $\square$ miles is 40 km
- 64 km is $\square$ miles

Roughly how many miles is 250 km ?

## Check your understanding <br> Answers

Use this fact: 5 miles $=8 \mathrm{Km}$

- 50 miles is 80 km
- 2.5 (or $2^{1} / 2$ ) miles is 4 km
- 32 km is 20 miles
- 15 miles is 24 km
- 25 miles is 40 km
- 64 km is 40 miles

Roughly how many miles is 250 km ? 155 miles.
