# Week 7, Day 3 <br> Solving equations 

Each day covers one maths topic. It should take you about 1 hour or just a little more.

1. Start by reading through the Learning Reminders. They come from our PowerPoint slides.

2. Tackle the questions on the Practice Sheet. There might be a choice of either Mild (easier) or Hot (harder)!
Check the answers.

3. Finding it tricky? That's OK... have a go with a grown-up at A Bit Stuck?

4. Think you've cracked it? Whizzed through the Practice Sheets? Have a go at the Investigation...

## Learning Reminders

## Express missing number problems algebraically.

$$
25+a=30
$$

This is called an equation and ' a ' stands for a mystery number.

$35 \div c=7$

We can think of this as 7 lots of something makes 35, so c is... 5.

## Learning Reminders

Express missing number problems algebraically.

$$
\begin{gathered}
3 e+1=18-5 \\
3 e+1=13 \\
3 e=12 \\
S o e=4
\end{gathered}
$$

The = sign acts like the balance point in the middle of a see saw... To keep it balanced, we must change one side of the balance by the same amount as the other. So, if we subtract 1 from one side of the = sign, we must do the same to the other.

$$
3 \times 5=17-d
$$

First, we need to calculate $3 \times 5$. $15=17$ - d, so d must be...?

## Learning Reminders

## Express missing number problems algebraically.

What is the total of the angles
inside a triangle?
How can we find a?
$90^{\circ}+45^{\circ}+a^{\circ}=180^{\circ}$
$135^{\circ}+a^{\circ}=180^{\circ}$
So $\mathrm{a}=45^{\circ}$

What is the total of the angles inside a quadrilateral? How can we find $b$ ?

$$
\begin{aligned}
& 80^{\circ}+60^{\circ}+120^{\circ}+b^{\circ}=360^{\circ} \\
& 260^{\circ}+b^{\circ}=360 \\
& \text { So } b=100^{\circ}
\end{aligned}
$$

## Practice Sheet Mild

## Solving equations

Solve these equations:

1. $7+a=12$

2. $15-\mathrm{b}=8 \quad$| 15 |  |
| :---: | :---: |
|  | 8 |
3. $2 c=24$

4. $d-2=18$

5. $e+10=23$

6. $4 f=24$

7. $g \div 3=4$

8. $90^{\circ}+35^{\circ}+a=180^{\circ}$

9. $60^{\circ}+85^{\circ}+b=180^{\circ}$
© Hamilton Trust
Explore more Hamilton Trust Learning Materials at https://wrht.org.uk/hamilton

Solve these equations:

1. $15-a=7$
2. $4 c=48$
3. $5 e+2=32$

| 32 |  |
| :--- | :--- |
| 5 e | 2 |

7. $72^{\circ}+36^{\circ}+e=180^{\circ}$

8. $45^{\circ}+85^{\circ}+120^{\circ}+\mathrm{c}=360^{\circ}$

© Hamilton Trust

## Practice Sheet Hot <br> Solving equations

2. $8+b=13$
3. $90 \div d=3$
4. $10+2 f=16$

| 16 |  |
| :---: | :---: |
| 10 | $2 f$ |

8. $56^{\circ}+2 a=180^{\circ}$
9. $130^{\circ}+150^{\circ}+2 \mathrm{~d}=360^{\circ}$

Explore more Hamilton Trust Learning Materials at https://wrht.org.uk/hamilton

## Practice Sheets Answers

Solving equations (mild)

1. $a=5$
2. $b=7$
3. $\mathrm{c}=12$
4. $d=20$
5. $e=13$
6. $f=6$
7. $g=12$
8. $h=4$
9. $a=55^{\circ}$
10. $b=35^{\circ}$

Solving equations (hot)

1. $a=8$
2. $b=5$
3. $\mathrm{c}=12$
4. $d=30$
5. $e=6$
6. $f=3$
7. $e=72^{\circ}$
8. $a=62^{\circ}$
9. $\mathrm{c}=110^{\circ}$
10. $d=40^{\circ}$

## A Bit Stuck?

$27+$ $\square$
$\square$

$$
\square-35=65
$$

$$
45 \div \square
$$

$$
=9
$$

We can rewrite these mystery calculations with letters instead of empty boxes.
$27+a=30$
b $\times 5=35$
$c-35=65$
$45 \div d=9$

The letters just stand for mystery numbers. We've used a different letter in each number sentence so we don't get confused.

Let's solve the equations (number sentences) to find what each letter stands for, e.g. $94+$ $\square$ $=100$

Choose a new letter to use instead of box - any letter is fine! Rewrite the number sentence:
$94+$ $\square$ $=100$

Work out what your letter stands for.

Repeat for the following, choose a different letter for each one.
$\square$ $\times 4=36$
$\times 4=36$

$$
80-\square=48
$$

$$
80-\quad=48
$$

$$
\square \div 2=54
$$

$$
\div 2=54
$$
